Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, drawn to a method of purification of contaminated water.

Group II, claim 11, drawn to a method for purification of gas.

Group III, claims 12 and 13, drawn to a device for purification of contaminated water.

Group IV, claim 14, drawn to a device for purification of gas.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, a special technical feature which these claims share does not define a contribution over the prior art. For example, the claims of Groups I-IV share a container or reaction tank for purifying water or gas by hydrate formation, as the special technical feature, which is considered to lack novelty or an inventive step in view of GB 1,360,797 (see page 2 line 85 through page 3 line 21).

A telephone call was made to Walter Grollitsch on 6/10/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
